Dear Friend,

A few years ago, I was working 14 hours a day at a sandwich shop in Dallas Texas trying to provide a living for my wife and children. I was in debt up to my eyeballs my house was falling apart and I had not been on vacation in 8 years.

Then one day I picked up a book called “Multiple Streams of Income” by best-selling author, Robert Allen. In that book, Robert talked about the necessity for people to create multiple streams of income in their lives and outlined many different ways to do it including the stock market, real estate and the Internet.

Immediately, I loved the idea of making money on the internet... There was just something extremely exciting to me about being able to work from anywhere in the world using nothing more than a computer and an Internet connection. I had no idea how to do it yet, but it sounded fantastic! So I began my journey.

Every night after work and after my wife and children went to sleep, I would get online and explore different ways of using the Internet to make money. There was NO short supply of opportunities.. Everywhere I turned someone was offering me another “proven” way to get rich quick on the Internet.

I joined Most Of Them, And Maxed Out My Credit Cards...

In the 2 years that followed, I spent Over \$10,000.00 racking up credit card debt buying eBooks, membership sites, special reports, opt-in loads, and joining every “guru” recommended business opportunity that flew into my email inbox and found in magazines like this one...

I stayed up learning, working and drinking coffee until 5:00 in the morning month after month filled with the hope of making money online. There were days when I’d come home late from my job, start working on the Internet, and work the entire night without going to sleep -

and then go back to work the next day!

I Was Exhausted, But I Was Beginning To Make Progress.

A few sales were starting to come in every day and I started receiving some commission checks in my mailbox every month for affiliate products that I was promoting online. It wasn’t enough to retire on yet, but it proved to me that I was on the right track and that it really is possible for an average person to make a living on the Internet

It didn’t happen overnight, but I eventually discovered the real “secrets” required to make money online using just a computer and Internet connection. In my third year of working part-time to build a home-based income. I finally broke through and cracked the code to earning over \$100,000 in less than 12 months from the internet.

It was actually very EASY but it had taken me a long time (3 years) to figure out how to make money online from home myself. I realized that I could help other people COPY my success MUCH FASTER.

That’s because I discovered that earning residual monthly income on the internet is all about duplication. By helping YOU make money online, I can grow my income too. It’s actually the perfect business model. I succeed only when YOU make money.

So instead of trying to figure everything yourself, I do over 90% of the work for you to shave years off your learning and profit curve.
